2012

ANNUAL REPORT

VERMONT
FISH & WILDLIFE DEPARTMENT

The Vermont Master Angler Program

Vermont's wealth of waters and abundant fish populations provide great opportunities to experience outstanding fishing. The Vermont Master Angler Program recognizes the achievements of anglers who catch trophy-sized fish from Vermont waters and celebrates the fishes' accomplishments in surviving and growing to such exceptional sizes.

The Master Angler program is a length-based program that sets "trophy sized" benchmarks for 33 eligible fish species. While these trophy sized fish are a challenge to catch, they are attainable for anglers that develop the necessary knowledge and skills.

The Master Angler program encourages anglers to target species that haven't traditionally been considered sport fish. To do so, they need to grow as anglers and improve their knowledge of fish habitat, behavior, and feeding preferences and develop new skills required to target and catch these species.

Award Categories

The program offers two award categories for adults and youths:

Trophy Angler: Anglers catching a fish exceeding the minimum qualifying length in any of the 33 species categories will receive a certificate commemorating the catch. Their names and catches will also be included in the Vermont Master Angler Annual Report, posted annually on the Vermont Fish & Wildlife website.

Master Angler: Anglers demonstrating the skill necessary to catch multiple species that all exceed the minimum qualifying lengths, in the same calendar year, will be recognized as "Vermont Master Anglers" and will receive a lapel pin at the end of the year. To qualify for the annual Vermont Master Angler Pin, an individual angler must submit qualifying entries for 5 or more species within a calendar year.

2012 - By the Numbers

2012 marked the third year of this increasingly popular program. Participation, not only in the number of entries received, but also in the number of individual anglers taking part, has increased substantially. Particularly encouraging is the fact that the number of youth anglers entering Trophy Fish more than doubled between 2011 and 2012, from 47 to 99 anglers.

While 95% (759) of the entries were from Vermont anglers, the program also saw participation from non-resident anglers from Connecticut, Illinois, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, and Texas. Entries were also received from Canadian anglers from the provinces of Ontario and Quebec.

2012 Trophy Fish Entries

A total of 799 trophy fish were entered in 2012 by 289 participating anglers:

- 520 entries from 190 adult anglers (32 Master Angler award recipients)
- 279 entries from 99 youth anglers (13 Master Angler award recipients)

Species Breakdown

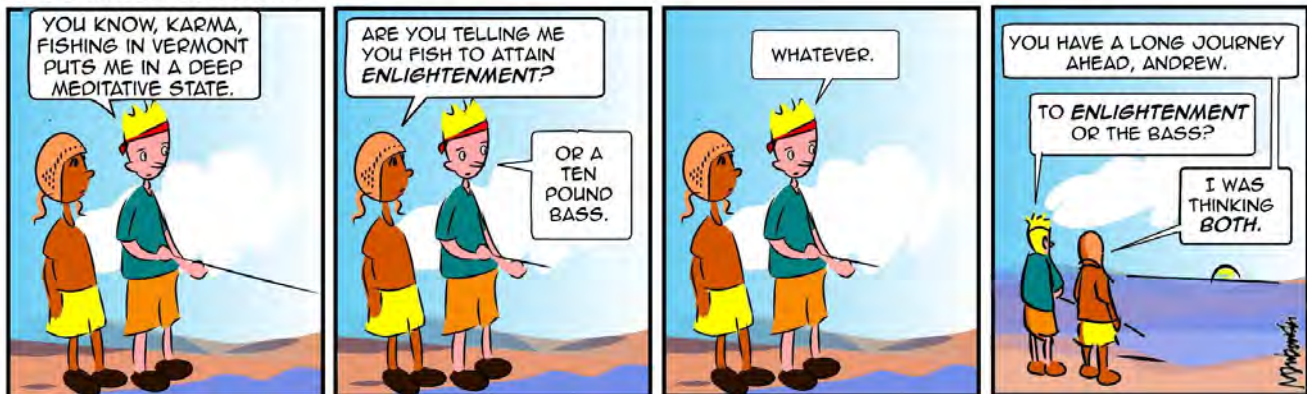

The entries in the 2012 Vermont Master Angler Program were a testament to the wide variety of fish species and the diversity of angling opportunities available in the state. Of the 33 fish species eligible for entry in the program, only 3 had no entries for 2012: American shad, lake whitefish, and muskellunge. American shad and lake whitefish are the only remaining eligible species for which no entries have been received over the life of the program. These fish species are typically less common or more difficult to target and catch.

				Total Entries	799

Catch & Release

Unlike previous Vermont record fish programs, the Vermont Master Angler Program accepts and encourages entries for caught-and-released fish. In 2012, 324 of the 799 (41%) trophy fish that were entered were harvested while 475 fish (59%) were released to grow bigger and be caught another day!

THE WILDERNUTS

Locations – Where the Big Ones Were Caught

Similar to the diversity witnessed in the species composition of the 2012 entries, the waters from which trophy fish were caught was also varied. Trophy fish entries were received from 86 waters around the state, an increase from 78 waters in 2011. As in the past, the most entries came from Lake Champlain. The following table provides a list of waters where 5 or more of the 799 entries were caught:
