Explanation of Legal Status and Information Ranks

State Rank and Global Rank - The rarity (abundance) or endangerment of a native taxon within Vermont's geographic boundary or throughout its range, respectively. Ranks are as follows:

- 1 - Very rare (Critically imperiled): At very high risk of extinction or extirpation due to extreme rarity (often 5 or fewer populations or occurrences), very steep declines, or other factors
- 2 - Rare (Imperiled): At high risk of extinction or extirpation due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors
- 3 - Uncommon (Vulnerable): Moderate risk of extinction\extirpation due to restricted range, relatively few populations or occurrences (often 80 or fewer), recent and widespread declines, or other factors
- 4 - Common to uncommon (Apparently secure): locally common or widely scattered to uncommon, but not rare; some cause for long-term concern due to declines or other factors; or stable over many decades and not threatened but of restricted distribution or other factors
- 5 - Common (Secure): widespread and abundant
- H - Possibly extinct/extirpated: Missing; known from only historical occurrences but hope of rediscovery
- X - Presumed extinct/extirpated: Not located despite intensive searches, little likelihood of rediscovery
- U - Unrankable: Currently unrankable due to lack of information or conflicting information about status or trends
- NR - Not ranked: Not yet assessed
- NA - Not applicable. Element is not a suitable target for conservation for one of the following reasons: Hybrid, Exotic Origin, Accidental/Nonregular, Not Confidently Present, No Definable Occurrences

The following may follow a numeric rank to provide further information:

- ? - indicates uncertainty about the rank; may also be expressed in the form of a range rank (e.g. S1S3)
- B - Indicates the preceding rank is for breeding populations
- N - Indicates the preceding rank is for nonbreeding populations
- M - Indicates the preceding rank is for migratory populations
- T - For global ranks only, indicates an infraspecies.
- Q - For global ranks only, indicates questionable taxonomy.

State Status - Legal protection under Vermont Endangered Species Law (10 V.S.A. Chap. 123) or informational category (not established by law)

- E = Endangered: in immediate danger of becoming extirpated in the state
- T = Threatened: with high possibility of becoming endangered in the near future
- SC = Special Concern: status should be watched (does not denote legal protection)
- RE = Recommended by Endangered Species Committee for Endangered (does not denote legal protection)
- RT = Recommended by Endangered Species Committee for Threatened (does not denote legal protection)
- PE = Proposed for Endangered Status
- PT = Proposed for Threatened Status
- PDL = Proposed for Delisting
- RDL = Recommended for Delisting

Federal Status - Designation under the federal Endangered Species Act, U.S. Fish & Wildlife Service

- LE = Listed Endangered
- LT = Listed Threatened
- SC = Species of Concern (does not denote legal protection)
- C = Candidate for Listing (does not denote legal protection)
- PE = Proposed for Endangered (does not denote legal protection)
- PT = Proposed for Threatened (does not denote legal protection)
- PDL = Proposed for Delisting

SGCN - Species of Greatest Conservation Need as identified in the Vermont Wildlife Action Plan; does not denote legal protection.
